

REGIONAL ENVIRONMENTAL CENTER

BUMP MLW and Conference 5-6 November 2014, Szentendre, Hungary

Eva Csobod
Regional Environmental Center

Co-funded by the Intelligent Energy Europe
Programme of the European Union

REGIONAL ENVIRONMENTAL CENTER

BUMP project

- Intelligent Energy Europe project of EC
- Support local authorities with population ranging from 40.000 to 350.000 inhabitants in 9 EU countries
- Bulgaria, Czech Republic, Germany, Hungary, Italy, Romania, Poland, Spain, United Kingdom
- Project period: from April 2013, for 3 years
- Main goal is a long term planning for sustainable urban mobility

Co-funded by the Intelligent Energy Europe
Programme of the European Union

REGIONAL ENVIRONMENTAL CENTER

Strategic objectives

- Fostering the development of Sustainable Urban Mobility Plans (SUMPs) and increasing skills in local authorities
- Fuel consumption reduction
- Improving air quality in the cities where new SUMPs have been introduced
- Health benefits (due to less road accidents and reduced pollution, cycling and walking)
- Investments in sustainable mobility

Co-funded by the Intelligent Energy Europe Programme of the European Union

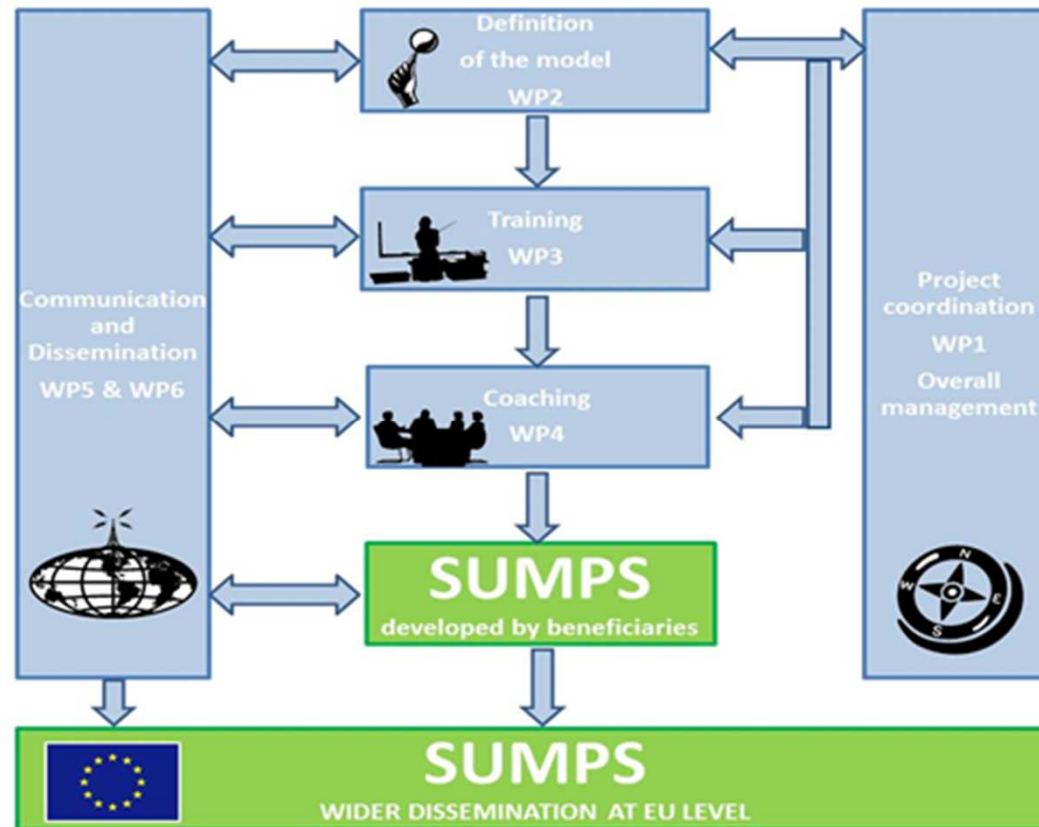

Project objectives

- Fostering the development of Sustainable Urban Mobility Plans (SUMP)
- Building capacity inside local authorities
- Promoting mutual learning and sharing of expertise among the officers and directors working for the local authorities involved in the project
- Spurring local authorities to join the CIVITAS network and disseminate project results

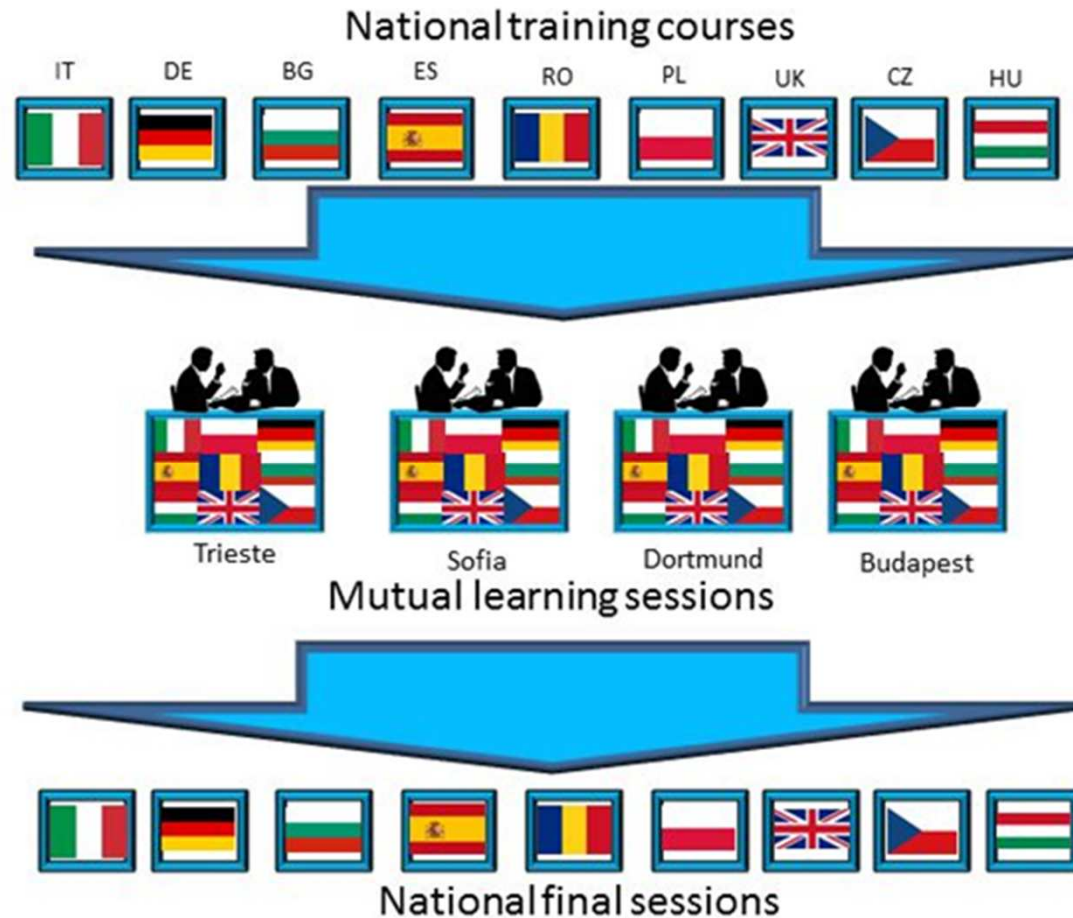

Flow chart

Trainings

REGIONAL ENVIRONMENTAL CENTER

BUMP project

Making urban mobility sustainable: in 4 steps

- Learn how to develop a SUMP
- Share know-how and expertise at an international level
- Develop your SUMP: a team of experts on hand to help you
- Raise your town's or city's profile: become a 'BUMP Pioneer'

Co-funded by the Intelligent Energy Europe Programme of the European Union

REGIONAL ENVIRONMENTAL CENTER

BOOSTING
URBAN
MOBILITY
PLANS

Perspective of SUMPs

Make city for more user-friendly with a better quality of life

- Make urban transport smarter, more accessible and more secured
- Provide cleaner environment and better health conditions for citizens
- Decrease energy consumption and environmental pollution
- Involve citizens and stakeholders in decisions

Co-funded by the Intelligent Energy Europe
Programme of the European Union

REGIONAL ENVIRONMENTAL CENTER

European level

We have the opportunity for

- strong European cooperation of countries and municipalities, experts and stakeholders
- dissemination of practices via media
- develop new sustainable mobility projects in Europe
- deduce CO2 emission
- increase health life expectancy

Thank you for your cooperation!
